

# Third Party I/O Servers

Many Wonderware FactorySuite™ 2000 applications depend upon reliable, quick, and accurate flow of information to and from factory floor devices (such as PCs & PLCs), remotely located devices (such as RTUs) and other enterprise information sources (such as DCSs). Wonderware and our Third Party Partners have developed programs called I/O Servers that facilitate information exchange between FactorySuite 2000 applications (plus other COM/DCOM enabled or DDE aware MS-Windows programs like those found in Office Suite '97) and the various protocols created and supported by a multitude of vendors who manufacture monitoring and computing devices. As “servers” these highly evolved programs provide data to any requesting MS-Windows DDE, fastDDE, and SuiteLink™, or OLE for Process Control (OPC) “client(s)”.

To facilitate the use of Third Party Partner developed OPC servers with FactorySuite 2000 (which acts as an OPC client), Wonderware has created OPCLink to enable COM/DCOM based communications with in-process and out-of-process OPC servers. OPCLink utilizes the OLE for Process Control (OPC) open communications protocol to allow access to OPC servers as data providers for all components within Wonderware’s FactorySuite 2000.

The following is a list of all known Wonderware and Third Party Partner developed I/O Servers. Most all listed servers support “fastDDE” and the new SuiteLink protocols - both of which allow optimized communications between FactorySuite 2000 applications. For convenience, several servers are listed that were not created with the Wonderware I/O Server Development Toolkit. While these non-toolkit developed servers do not support “fastDDE” or SuiteLink, they may be suitable for some applications. Please visit our website at <http://www.wonderware.com/partners> and refer to **WonderTools™** and **I/O Servers** for the most up to date list of currently available I/O Servers, including more detailed information regarding each I/O Server, plus an explanation of the WonderTools Third Party Partners Program.

**All servers listed herein are developed, sold and supported by the companies referenced.**

# Contacts for Third Party Server Sales and Support

The following companies have developed, tested, and support one or several of the I/O Servers listed above. In virtually all cases, these servers have been developed with the same tools that Wonderware uses to develop its servers, the Wonderware I/O Server Toolkit. Should you wish to develop your own I/O server(s), this Toolkit is available for purchase from your local Wonderware distributor. Should you wish to engage a third party to develop a server for you, the companies listed below with an asterisk (\*) beside their names have specifically indicated that they would be available. For questions on price and availability please contact the appropriate person below.

Mr. Jim Winfree
